

SMS CUBE

WEB SMS APPLICATIONS SUITE

Send, receive and manage SMS messages from your web browser, reaching mobile subscribers in 190 countries over a single account you'll set up in no time. Infobip Worx is a collection of powerful, user-friendly web SMS applications, connected to our proprietary messaging network, one of the largest in the world. It is suitable for large companies and small businesses, as well as institutions, NGOs and marketing agencies.

Fully customisable, **smcube** is also a complete solution for SMS resellers. Advanced options include campaign management, subsidiaries solution, blacklisting, and self-service for registering alphanumeric senders. Real-time number validity check, 2-way SMS and USSD messaging are supported; the interface is available in 18 languages.

GET STARTED IN NO TIME

- 1 Get your username and password.
- 2 Log in to **smcube** over the Internet.
- 3 Text any number of recipients, no matter the country or mobile network.
- 4 Manage your traffic and contacts - schedule campaigns, set expiry and delivery speed, receive and manage replies, create groups.
- 5 Check your stats - delivery, message status, expenses, invoices.
- 6 Top up your balance easily - use bank transfer, online banking, credit cards.

Need to send your SMS campaign, or a quick notice for 30 people? Need to manage a large number of recipients within a file or application? Send personalised messages. Save specific attributes within your message. Use any characters of any of the world's writing systems (Unicode).

CAMPAIGN MANAGER

While in **smcube**, easily access Campaign Manager and make light work of creating a marketing campaign. Broadcast campaigns, polls, sweepstakes, and coupons. Simply log in, input your questions, and watch Campaign Manager do the rest. After the job is done, CM offers full campaign report and statistics.

TOOLS AND APPS

With Quick SMS, Professional SMS, File2SMS you can easily adapt to sending 20 or 20 000 or 20 million SMS messages. View and track your inbound traffic in SMS inbox. Get in-depth reporting for unparalleled transparency and control.

Address Book allows you to upload your contacts from a spreadsheet file. Track all messaging activities of your account and subaccounts with Analytics, a comprehensive report centre. Perform real-time Number Context queries to eliminate invalid numbers, or those roaming, to reduce costs.
